## BOA FEATURES AND BENEFITS

- Rigid, heat-moldable Kydex contoured Chairback for increased posterior rigidity for sagittal and lateral control. Chairback attachment is designed to provide support from the sacrococcygeal junction up to T-9 vertebral level.
- Removable Chairback liner to allow for frame modifications and cleaning
- Rigid, heat-moldable Kydex contoured anterior panel and liner for increased abdominal compression and rigidity to reduce loads on the intervertebral discs.
- Rigid, posterior Proprietary Compression Panels for a smooth, uniform pull
- Lifetime guarantee on the Proprietary Compression Panels
- Easy-to-use Compression Technology with a simple hook and loop Velcro anterior closure
- Simple, pull handle to allow for a quick closure that can be easily adjusted according to patient need
- Breathable, interior spacer fabric that is soft enough to comfortably wear against the skin
- Outer mesh fabric that allows heat to escape without compromising stability
- Posterior, internal elastic compartments to accommodate lordotic foam inserts for the treatment of lordosis
