

CALIFORNIA SOFT SPINAL ORTHOSES

california™ SOFT SPINAL SYSTEMS

The prefabricated California Soft Spinal family includes the Original California, Compression, and Low-Profile modular orthoses. These spinal systems offer effective treatment solutions for a variety of clinical indications. Each orthosis can be ordered with a variety of components and options to offer a comprehensive range of control.

The California Soft Spinal orthoses feature:

- Completely modular, adjustable, and lightweight LSO or TLSO designs
- X-ray compatibility
- Easy donning/doffing and comfort to facilitate optimal patient compliance
- Anterior and posterior insert panels that can be modified for support and stabilization
- Predrilled components for retrofitting and interchangeability
- Breathable material that wicks away moisture

Compound Closure System

- Available for all California Soft Spinal designs
- Provides adjustable compression
- Low profile design
- Accommodates hip development to enhance fit and function
- Aluminum stays contour to lower back
